Quick change system hole saws

Modular re-tooling system for ambitious hole saw users with highest demands

- Thanks to a novelty quick-change holder solution with the right drills and adapters, the consumers can arrange their own hole saw combinations as individually required.
- The re-tooling system is a professional alternative to standard shank solutions and offers considerable time and space saving potentials.
- Thanks to the new adapter solution, only one quick-change tool holder is required for different hole saw qualities, which creates extra space in tool boxes.
- Besides, the innovating interlocking system does not require the hole saws being screwed on and off all the time.

- for Bi-metal hole saw blades, universal hole saw blades, diamond hollow annular bits, centring drill, adapter
- packaging: storage box on card
- suitable for 3980000, 3981000, 3984000
