COMBO SHARPENERS

C-CLIP COMBO SHARPENER MULTI-PACK

C-CLIP

Three, legendary Lansky tools that will sharpen your blade with superior results, regardless of experience.

C-CLIP KNIFE SHARPENER. The C-Clip Knife Sharpener can be used to sharpen knives, fishhooks, darts, arrowheads, tools, needles, surgical-type tools, and more. At home, camping, fishing, hunting, boating, at work—the C-Clip is the most convenient solution.

THE "MINI" KNIFE SHARPENER. The "Mini" Knife Sharpener can be carried on its keychain, on a belt hook, or like loose change in a pocket. You can keep this sharpener with you all the time!

ERASER BLOCK CLEANER. It's more than a ceramic rod cleaner! Eraser Block works right out of the package to keep your ceramic rods clean and sharpening at peak efficiency...and it can erase hard to remove stains and spots on practically any surface, including sports equipment!

FEATURES

- The C-Clip and the "Mini" both have 1000 ceramic grit rods.
- The C-Clip rods are set at 20°.
- The "Mini" has Large (A) and small (B) blade openings that provide access to intersecting portions of alumina ceramic rods for "pull through" sharpening. Rod angles are set at 22.5°.
- Includes half-sized Eraser Block made of synthetic rubber and an abrasive substance for easy ceramic rod cleaning.

Select the sharpening angle that is best suited for the knife's intended use:

- 30° Best for heavy duty use
- 25° Ideal for hunting and outdoors
- 20° An excellent edge for kitchen and slicing
- 17° Best for fillet knives, razor blades or similar

SOFT-GRIP DUAL THUMBSCREW KNIFE CLAMP

RCLAMP

The **dual thumbscrew Soft-Grip Clamp** was designed specifically for those looking for an easy to use clamp, that would also prevent scratching on coated or highly polished blades. **Not for use on blades 1/2" wide or less**. Can hold almost any blade up to 7" long.

CONTROLLED-ANGLE SHARPENING SYSTEMS

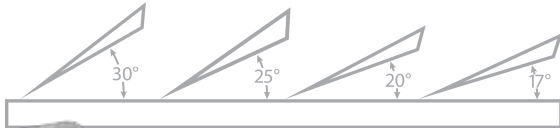

Angle consistency is the most critical, most elusive element of hand sharpening—and the **Lansky Controlled-Angle System** ensures that your knife's edge sharpens to the **exact bevel you specify**.

The knife clamp holds the knife steady and holds the angle guide static and firm. This allows the user to achieve the desired angle with every stroke of the sharpener.

STANDARD KNIFE CLAMP

Standard notched clamp comes in every kit. Select the sharpening angle that is best suited for the knife's intended use:

- 30° Best for heavy duty use
- 25° Ideal for hunting and outdoors
- 20° An excellent edge for kitchen and slicing
- 17° Best for fillet knives, razor blades or similar

Standard Knife Clamp
